IntelliDocX

AZURE
SAP CONTENT
SERVICES

Use Microsoft Azure for SAP ArchiveLink ECM plus leverage Azure to extend SAP processes, to optimize document processing activities and leverage supporting robotic process automations.

AL-ACS addresses the requirements of SAP customers desiring to not only store SAP business content in the cloud, but also intelligently provision content so SAP processes are instantly and fully content enabled. Our approach to Content Services for SAP allows enterprises to leverage Microsoft Azure assets to manage SAP content plus automate supporting content centric process activities.

SAP® Certified
Integration with SAP S/4HANA®

Intelligent Content Management
- Meta Data Driven
- Advanced Content Search
- Content linked to workflows
- Don't save docs in SAP HANA memory; use the MS Azure cloud!

More efficient document processing

**Use Azure Storage to Content Enable SAP Processes
No Gateways, VMs, or Host Servers - Native Azure Service!**

Azure Services for SAP ECM as a Native Cloud App
- Access/utilize all process related content with a single click
- Auto-attach content from outside SAP to related SAP transactions
- Runs under Azure Resource Manager
- **Provides Common Content Store with SuccessFactors**

Use Azure Blob or SharePoint On-Line content storage

Why customers use AL-ACS

- SAP ECM becomes Azure cloud enabled
- Reduce Content Storage Costs
- Inside SAP, documents now one click away
- SAP & Azure Users work with same content
- Have both SAP & ECM Azure hosted together
- Power, Security & Reach of Azure Cloud

Full SAP/Microsoft Interoperability
- SAP ArchiveLink & MS standards based
- SAP content services exposed as MS Azure services
- Initialize and configure in matter of minutes

Use your own Azure Service Plan

"We saved over 30,000 person hours in a year by content enabling the handling of sales contracts in SAP; everything needed through the contracting process was a single click away and we used process optimizations to shorten our contract cycles. Yes, we are running our business even better!"

Associate Director, IT Productivity - Collaboration Services, NTT Data

AL-ACS is based on its' core SAP ArchiveLink Adapter and HTTPS connected Web App, such that SAP's ArchiveLink framework functions as a native Azure Web application.

SAP® Certified
Integration with SAP S/4HANA®

New! Azure Common Content Store for SAP ERP & SuccessFactors HXM

Content Enable Any or All SAP Processes

- Finance, A/P & A/R, Purchasing, Sales, HCM, Asset Management, Customer-Vendor-Material Masters, QM, Delivery Management, Projects, Vendor Invoices, Plant Maintenance, etc.
- For both inside-SAP users and O365/Azure users, business documents are one click away and process cycles shortened

Leverage Microsoft Content Storage of YOUR Choice

- Directly connect your SAP to Azure Storage, either SharePoint On-Line and/or Azure Blob Storage
- Configuration based implementation in a matter of hours
- Provides for a business ROI measured in just months

Go beyond just ECM – Automate Content Processes

- Ready to Use API Services for Apps and Users external to SAP
- Advanced Search for both SAP and O365 users, remote attaching of documents to SAP records, distributed workflow activities and Azure based Ingestion, Capture and OCR services, along with transactional data read/write/update to SAP.
- Teams, O365 & Power Apps. ACS API services work with Power BI, Virtual Agents, Automate, AI and robotic process automations.

Run a 100% Cloud SAP

- ALL Azure SAP ERP, ECM & SuccessFactors
- Any Cloud SAP linked to Azure ECM – Hybrid Cloud
- Move SAP Hana Content to Azure
- Replace Legacy On-Prem ECM with Azure Cloud ECM for SAP

SF_CCS Module provides Common Content Store with SuccessFactors

- Employee Content Files available to users in SAP HR and SuccessFactors HXM

Let us show you how to implement a full solution for any given line of business process in less than a day.

An offer to get you started:

- You have SAP
- Microsoft Azure is ready for you now
- We will set-up your first AL-ACS business scenario at no charge
- SAP users will be storing and recalling documents from the Microsoft Azure cloud the same day
- Then turn-off your Legacy ECM. BTW, We have tools to automate that migration!

Initialize Resource Groups via Azure Templates

Manage with Azure Resource Manager

Gain business leverage from Microsoft Azure Platforms, better manage SAP documents & optimize content-centric SAP processes

- Users anywhere view, save, update, distribute & collaborate using business documents within the context of SAP processes
- Moving SAP to the Cloud? Connect it to the best cloud ECM/Content Service available; Microsoft's
- Meta data-based content services & full Microsoft interoperability enable process automations and content utilization without boundaries

Experience that drives continuous business value

As the original pioneers in solutions for SAP/Microsoft ECM interoperability, starting with SharePoint 2001, our team continues to drive quickly-realized ROI for customers around the globe. Our solution is unique not only in its breadth of functionality, but in its' native, cloud-first, Azure app services capabilities. Our global network provides follow-the-sun support and services with the expertise to help you run your business even better.   Product site: www.icontentsaas.com
